**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Strong to gale force winds combined with persistent rain and fairly low air temperatures will combine to make it feel especially cold. Ensure you have spare layers of clothing and waterproof gear as it will feel unseasonably cold in the rain and wind. Wind speeds likely to be 5-10mph higher than the table on the highest summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 29 Apr 2024	0.6mm	2mm	2.2mm

Forecast for Tuesday 30 Apr 2024

Weather: Further spells of rain, heavy at times, are expected throughout the day. The rain will probably ease by the evening to leave a much drier end to the day.

Maximum wind: South-south-easterly 30mph gusting 45-50 mph at times.

Chance of cloud-free hill tops 600m: 20%.

Low cloud and visibility: Moderate visibility falling to poor or very poor in heavy rain or hill fog. Extensive cloud with bases 300-400m, perhaps lifting for a time in the afternoon, with cloud covering hills above 600m.

Temperature: **Valleys:** Plus 7 Celsius rising to plus 11 Celsius.
At 600m: Plus 6 Celsius.
Freezing level: Above the summits.
